

# EDUCATIONAL FIELD TRIPS

Grasshopper Learning Center provides one-on-one tutoring for any subject and any grade, ACT (and other test) prep, and homework help. We also host summer camps. And now, we are excited to offer our space, time, and resources as a **field trip destination!** The following options are educational field trips that can be tailored to fit your school's needs.

## CAMP FROG

Explore the ecosystem at the pond! Check out the beaver's den and all the engineering he's been doing. Observe predator/prey and symbiotic relationships. Fish, catch frogs, find animal tracks in the mud, watch for birds. The point is to enjoy the outdoors and make the connection that science is living and all around us!

## GREENHOUSE GREATNESS

Plant all the things!! This is very customizable with fantastic books for any age that go along with this theme. Inspect plants and roots at any stage of development, plant our own seeds, learn about caring for plants at home, explore soil through microscopes, eat some veggies. Lots of options!

## SURVIVAL SKILLS

Fire and Water, Food and Shelter (multiple day options). **FIRE:** Explore the science of fire, learn and practice simple fire starting methods. **WATER:** View pond water under the microscope to discover why boiling and filtering water is necessary. Build and use a water filter. **FOOD:** Identify edible plants. Observe nature for other food sources. **SHELTER:** Review tent set-up then move to the woods for more primitive shelter builds.

## NURTURED BY NATURE

Run, sun, fun, quiet, movement, meditation, tree climbing, natural obstacle course. This is designed to be a day of healthy enjoyment of being outside! Very customizable for any age group.

## NATURE CRAFTS

Seasonally or holiday themed crafts using materials provided by nature. Endless possibilities.

## MEET MRS. JUNIPER

Learn plant and tree identifications while exploring 160 acres of pasture and woods. Language is how we connect. If we learn the names of things in nature, we begin to feel more connected to it, and the benefits of that are endless!

## CRITTER CONVERSATIONS

Meet the animals... hands on! Goats, ponies, chickens, cats, dogs. Learn about them, their care, their diets, their needs. Enjoy the sunshine and the critters!

For questions, more information, or to schedule a field trip, please contact Kelley James:
